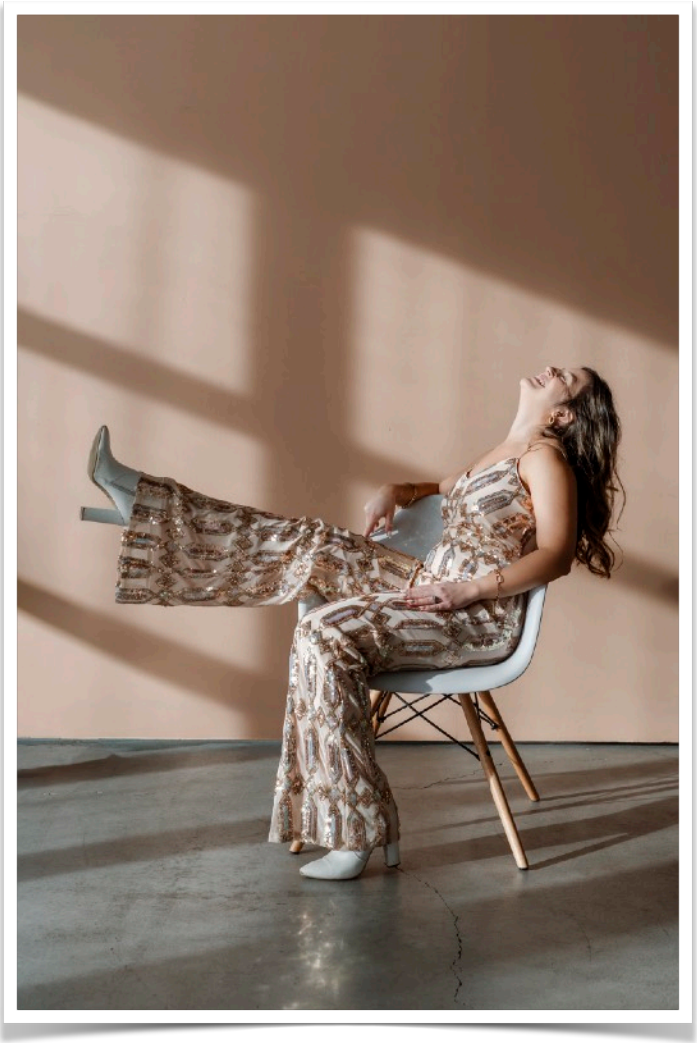
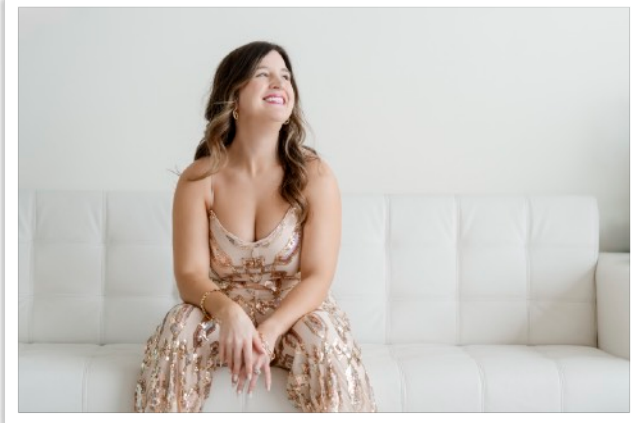
BUSINESS BRANDING PHOTOS

ABOUT

Having professional photos that represent YOU and feel authentic to your brand are an essential part of presenting yourself and your business to the public.

With my multi-genre photography background and eye for branding I am able to offer personal branding sessions that include more than just headshots.
The goal is to produce a variety of images that you can use for your website, marketing materials, and social media.





WHAT TO EXPECT

1. Video Consult and Planning Meeting:
The first step is a 30 minute video meeting where we can talk about your needs, goals, business, brand. This is where we will hone in on the aesthetic and overall vibe you want to present moving forward and come up with a date and game plan for you photo session.

2. Your Session
My style is relaxed and fun. It is very important to me that everyone is comfortable- especially for headshots where the goal is to capture your authentic self. Sometimes it is helpful to play music or even sip a beer. It is my job to make sure that everything looks good. It is your job to have a good time.

3. After the Session
You can expect editing to be completed within 3 weeks. Once your photos are ready you will be sent an online gallery of all the best images. All images will be professionally edited. You will then have the ability to download all the high res files and start using them to promote your business!
