WELCOME  
GUIDE

# ABOUT

Hi! I'm Alonya E. Lowe, owner of Alonya Photography. I specialize in photographing pregnancy, birth, babies, and children. I love looking through my lens and capturing the unique spirit of each subject I work with. I am passionate about what I do because I know that the images I take will become a treasured piece of your family's history. My style is classic, clean, and emotional. It is always my goal to let the subject of my images shine and allow for genuine love, connection, and joy to be captured in an artistic way.

I am so excited to create special images with you. Let's have some fun and make memories!

*Alonya*

Oh hey, it's me!

# SESSIONS

All sessions are on location. This means that I come to your home or a location that fits the style and vision of your session. My photography is about capturing what is special about your family. I keep my sessions relaxed and fun. I will make sure that everyone is comfortable and will not force your children to pose in any way that they do not want to, but will instead follow their lead and let them be themselves. This approach always gets genuine images full of love and connection that you will truly treasure.

## Birth Coverage:

Having a professional photographer present to capture the story of your child's birth is a decision you will never regret. As the daughter of a midwife I have a special appreciation for birth and act as a fly on the wall capturing all the precious moments of the most important day of your family's life.

## Newborn:

Newborn sessions are best done within the first two weeks after birth. This is when your newborn is still super sleepy, more relaxed, and in that super delicious newborn stage. These sessions can last up to two hours. I will bring some simple blankets and swaddles just in case they are needed, but the session is all about capturing your new baby in a natural way.

## Baby, Child, Family:

These sessions are fun and I love to capture the true spirit of your children. I do not charge for extra people, but an extra charge will be applied if the session goes over 90 minutes which may happen if you have a large family.

## Maternity:

I love maternity sessions. I want to help you recognize how beautiful you are at this unique time in your life. Maternity shoots are best done 28-34 weeks of pregnancy. This is when your bump is defined but you still have some energy and hopefully aren't too uncomfortable. I will come to your home or location of your choosing and we can try different types of setups and incorporate the rest of your family.

# WHAT TO EXPECT

## Before the session:

The first thing to do is to contact me with your request for a session which you have already done! From here we will correspond by email or phone. I love to have a chat with my clients at least once so we can get to know one another and I can gain a good understanding of your hopes for the session. I consider all my sessions to be a collaboration.

## During the session:

All sessions are on location. That means that I come to your home or we meet at a location of your choosing. I'll have you pick out a few outfits before I arrive and together we will discuss what works best. Sometimes there is time for an outfit change. I will also take some time to look around your home and find the optimal spots for the shooting.

Sessions can last up 90mins. Because I am working with babies and small children the little breaks needed for nursing, snacks, and the occasional meltdown are built in.

My style is relaxed and fun. It is very important to me that everyone is comfortable. When photographing children my goal is to let them be themselves and shine right through the lens. For family photos, when you are relaxed and enjoying connecting with one another the best images are always captured. It is my job to make sure that everything looks good. It is your job to have a good time.

## After the session:

You can expect editing to be completed within 3 weeks (typically turn around is under two weeks). Once your photos are ready you will be sent an online gallery of all the best images (typically 50-70 images). All images will be edited, but I am happy to do additional skin retouching on your 4 favorite images. \$10 for

# PRICING

All portrait sessions: **\$550**

*Sessions include:*

- Your gallery will expire after 2 months
- \$50 off to all return clients

Maternity + Newborn  
\$100 off your maternity  
session when you book  
newborn at the same time

# BIRTH

## CAPTURE THE MOMENT YOU MEET YOUR BABY

Having a professional photographer present to document the most important day of your family's life is a decision you will never regret. Birth is a total whirlwind when you are in it and there is a lot about the experience that you will forget. The images I take will preserve a tiny piece of that beautiful whirlwind in an artistic way for you to enjoy for years to come.

### Birth Coverage \$1900

- 24/7 on call service the week before and after your due date
- coverage of birth from late stages of labor to 2 hours after birth
- all digital negatives available for download in a private gallery
- \$100 toward your newborn session

### Fresh 48 Session \$900

- images at the location of birth within the first 48 hours of your baby's life

I process birth images in black and white. This helps tell a cohesive story and emphasize the emotion of the event by keeping the images simple and artistic rather than cluttered and medical. Color birth stories can be done upon request.
